IN ILLINOIS HOUSE.

Two Important Bills Introduced-Motion to Reconsider.

Springfield, Ill., Dec. 16.-The session of the house Wednesday was made somewhat interesting by a wordy war over the Novak resolution requiring a roll call on a motion to adjourn sine die. In the end further consideration of the resolution was postponed. Mr. Selby succeeded in passing a motion to reconsider the vote by which the inheritance tax appropriation bill failed to pass, and it was made a special

The La Monte bill to provide for the assessment of grain in elevators was introduced. Government Stamp Demanded on All Our Exports.

Washington, Dec. 16.—It is expected that the committee on agriculture in the house will have the agriculture appropriation bill ready to report by the last of this week. The amount of money it will carry will, in all probability, exceed the appropriation of last year, although it is quite likely that many of the items heretofore liberally provided for will be reduced. Mr. Wadsworth, of New York, chairman of the committee, said:

Something Which the Best Players Cannot Always Avoid.

PART OF THE LUCK OF THE GAME.

How Players In Duplicate Contests Suffer From the Mistakes of Others-A Specimen Game In Which Seven Tricks Were Sacrificed.

Frightful "breaks" are made at times chief officer of the court and asked: by even the best of whist players. The "fall down" is a factor in duplicate whist to this lion daily?" that must always be taken into account. It is a part of the "luck" of the game. Suppose there are several tables in play for a pair score. The East and West pair an actual petition had been granted, at table No. 1, say, throw away three withdrew from the horse's side and lay tricks by wretched play, giving their down again, quite pacified. North and South adversaries ten tricks on hands that are worth only seven. In fact, seven tricks are made North and South at every other table. Now, the scores at this style of game are computed by comparison. All the North and South scores are compared one with another; the East and West scores separately. It follows that in the case supposed every North and South pair except the one at table No. 1 suffers to the extent of three tricks-and why? Not because North and South at table No. 1 have outplayed them, but because they have received a gift from their East and West adversaries-in short, because East and West have blundered. It is not the fault of any North and South pair; they all suffer through another's | January 4, 1898, at a fare and a third fault.

This, of course, looks like injustice. It is not, however; it is necessity. It is a flaw perhaps in the duplicate game, but it early experience, "kick" against being penalized for a misdemeanor with which they have really nothing to do. They soon realize that if they would play duplicate whist they must not mind being the victims of such luck now and then. The game of cards in existence, its flaws included, and the best intellectual sport of any kind, not excluding chess.

I was induced to make these observations-which are not altogether new, but, like all philosophy, will bear frequent repetition—because of a deal that recently came to my notice. It occurred in a game for pairs, three tables being involved. At table No. 1 North and South got 11 tricks, which were easily in their hands. Their East and West adversaries, of course, got two. At table No. 2 North and South 25 and 31, 1897, and January 1, 1898, ders, which cost them no less than seven on the North-Western System within tricks. They got only four tricks, as com- 200 miles of selling station. For pared with 11 at table No. 1. Their East tickets and full information apply to and West adversaries consequently got nine. It was perfectly proper that North and South at table No. 2 should incur the full penalty of their bad play, but another result ensued which was not properthough inevitable. East and West at table No. 1, getting only two tricks (and being unable to get another one), still lost seven tricks as compared with East and West at card beneath is led next:

Trick 1.—The North hand seems to be strong enough for the trump attack at once, but the diamond first is quite sound place at table No. 2. At table No. 1 North led the 5 of trumps; partner drew two rounds with the king and queen, and then opened his diamonds low. North wen with the 10, and took out the third round of trumps for two tricks in the ending.

Trick 4.—Here is where South committed harikari. He was an excellent player -one of the finest in the country-and yet, with partner trying to get trumps out, he taken the 11 tricks to which they were entitled. The popularity of dumbbells is shown by the fact that over a hundred entries were received soon after the announcement of the New Jersey Athletic club carnival at the Madison Square Garden in New York. The Germans were slightly in the majority, but there were contingents from Switzerland, Austria, Italy, Sweden, Norway, England, Ireland, Scotland, Canada, and a formidable brigade of native Americans.

The Lion's Petition.

Sultan Muley Abderrahman of Marocco was very fond of wild animals and had coolness of nerve in Caling with them. WAGES ARE INCREASING. And now come the reports of increase in wages in both manufacturing and mining regions. The earnings of factory hands in the manufacturing sections have already been increased in many instances, and recent dispatches from Pensylvania, Michigan and Ohio show that a number of the great iron mines of Pennsylvania and Michigan are to increase the wages of Only 10 cents a pound at Sanborn's. their employes ten per cent. on January first, and that the limestone operators of the Mahoning Valley in Cook & Co. Ohio, have increased the wages of their employes twenty per cent. The first effect of the return of a protective tariff was felt in a large increase of the number of people employed, and that is now being legitimately followed by the second result, an

crease of wages.

Democrats are watching cougress closely. They are sadly in need of campaign ammunition for the coming congressial fight, for the party out ci power always expects to make an aggressive campaign based upon the official action of the party in power. Up to this time the administration and the republican congress elected with it have furnished so little material for criticism that the democratic leaders the loss was postponed to have the are at a loss for campaign ammunition for the coming congressional contest.

The Chilians are buying gold in London, preparatory to the establishment of their gold standard currency system. Hereafter their silver coins will be maintained at a fixed value without reference to the fluctations in the price of the metal of which they are made, as is the case in all countries having a limited silver coinage with a gold standard of value.

The Kansas Board of Agriculture announces that the combined value of wheat, corn and oats raised in that state this year is \$66,768,788, an increase of 30 per cent. over last year. No wonder Kansas gave a republican majority in 1897 for the first time in several years.

The doleful predictions of the freetraders that the adoption of a protective tariff would cut off foreign marets for American products are not being realized, our exportations having increased since the enactment of the Dingley law.

which they have stripped from the glistening trees during long walks in the country. Here is a pretty way to utilize

A good sized piece is needed to make a waste basket-although smaller ones are pretty to hold grasses-one that has been stripped unbroken from the tree. Make a cylindrical foundation of very heavy cardboard just the size of the bark. Line it with a pretty colored sateen. Cover the outside with the bark. Cut a circle of the cardboard to fit the base of the basket. Cover one side with sateen wadded with cotton, the other with birch bark, and, placing the sateen lining inside, overhand it with strong linen thread to the part of the basket already made. The ribbon which ornaments the top is slipped between the

lining and the birch bark and sewed in place with silk of the same color. It is then left to hang over the edge-one long, one short alternately. The end of card is decorated with clover blossoms each ribbon is folded to a point and is tipped with a tiny silvered bell.

* PRETTY CHRISTMAS GIFT.

Chafing Dish Recipe Book That Is Useful and Ornamental.

A very useful Christmas gift for a savory dishes that can be easily made in that ever ready little cooking utensil. The covers are made of heavy brown linen with a suitable design

drawn with brown etching ink or worked in brown linen thread on the front cover. Inside are a dozen leaves of strong linen paper, on which are written in brown ink recipes for Welsh rarebit, creamed oysters, omelets and every imaginable concoction that can be made in a chafing dish. There are so many now to be found in the newspapers-some of them the work of the best cooks-that it is a very easy matter to gather enough to fill the book. A few pages should be left blank for the recipient to write new or favorite recipes. The writing should, of course, be very clear and distinct.

Sending Christmas Presents.

A word about the manner of sending a Christmas gift. A dainty wrapping will give a holiday air to the little remembrance that will add greatly to its value. The prettiest way to dress a Christmas gift and the one that savors most of sleighbells and freshly fallen snow is to wrap the parcel in glistening white French tissue paper and tie with silver cord or scarlet ribbon, slipping a bit of crisp holly or mistletoe through the knot and then fastening in a bow. Natural flowers are also used. For example, a dainty box containing a gift for a tiny child is wrapped in snowy paper and tied with white satin ribbon of the narrowest width, through which is thrust a bunch of tiny rosebuds, their ends just turning pink. In using flowers their color should always follow the color scheme of the gift as far as possi-

Souvenirs For Christmas Gifts.

A bright girl is concocting a square dozen of souvenirs for Christmas gifts. Last summer there was a jolly party of friends camping together in the Blue mountains, and this young woman, with her camera outfit, was an enthusiastic participant in the delights of the out of door life. Of course a series of views and groups was the result. She is now busy evolving from these views a dozen effective little volumes to be tion forming the top is cut to fashion used as tokens on the 25th of the month.

The leaves of the books are cut from heavy cardboard, into which the photos forming a sort of binding at the top of are set as in an album. HOLIDAY SUGGESTIONS.

Two Neat Christmas Presents That Can Be Made by Hand.

Among homemade Christmas pres-Many people carry home from their ents a set of envelopes for interesting summer outing pieces of birch bark clippings can be made as elaborate as

one wishes. The essentials are to take long envelopes and label them for the various purposes for which they are intended. For instance, one set contains one envelope each for clippings relating to politics, medicine, society, stocks, religion, poetry, celebrities and college news. Such a set should be a very nice present for a sister to give a brother who was prominent in college journalism. Just the bare envelopes tied together with the college colors would suffice, but to make the set more fanciful take some chamois skin and cut it large enough to form a sort of book cover for the envelopes, decorate it if possible, but if not simply print the word clippings in gilt letters on the back. Then lay the envelopes together and punch two holes about 21/2 inches apart, make holes in the chamois cover to correspond and run ribbons through envelopes and cover to tie them together.

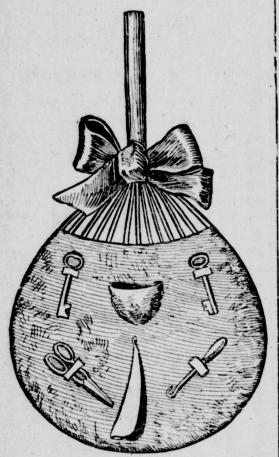

Another fancy made after the same fashion is a number of decorated cards tied together in a book. The cards are long and tied at the ends. The outside and labeled in gilt letters, "Baby's Progress." The next leaf has "Baby's A russet red or any color suggestive Birthday," next "Baby's Name," next of autumn leaves or else a pale green or "Baby's Weight," with spaces for weight at birth, at one month, at two months, at six months, etc.; next, "What Baby First Said," and last, damages. Cut a piece of stiff card the exact size of the blade of the fan, cover it with chintz or plush and cut a little shield shaped pocket for the watch. Lower down on the screen add two

small straps of plush to hold seissors and button hook. Three or four small hooks sewed to the cardboard in convenient places serve to hang keys, shoehorns, etc. Cover the fan on one side with silk, lay the plush side on the screen and sew the two together. The past two months The Leader has been busy receiving goods for the holiday trade. Every available space and corner is crowded full with useful and artistic articles. Our store was tound to be too small to hold the great array of articles so The Leader secured the store room formerly occupied by E J. Green, as its Annex. This store too is crowded with Toys and Christmas articles of all kinds. Foreign and domestic markets were searched for the prettiest goods for the Christmas season and such an array of loveliness Janesville has never before seen.
